Subject: Implementation of Web based second level password

Dear Sir / Madam

This is to inform you that Pakistan Stock Exchange has implemented a more secure transaction control. Please note that as per new rule, you will have to use 2nd level password also before logging in the web based trading system. The procedure in this regard is given below:

Upon entering 1st password in web based application login field, a window will pop up for you to generate a 2nd level password. The system will generate a 2nd level password and send it to your registered email account.

After getting the 2nd level password from your email, apply it in web based application login field.

It is important to understand that you will receive the email only on the registered email address you have provided. Therefore, kindly make sure that the registered email should be active.

 In case you want to change the email address, kindly request here: monis.farid@summitcapital.com.pk

Please note that the new security feature will start working from Friday 26-01-2018. We are available to support you if you need any assistance. You may contact us on:

Phone: 021-32467966
Email: Saeed.turabi@summitcapital.com.pk
Email: Sattar.ahmed@summitcapital.com.pk

Thanks you

Sincerely
